

NurseCall IP IO Interface

Art.: ERTH0015-1

LAN contact module

Description:

LAN-based IPIO interface is equipped with 6 inputs and 5 outputs. It can analyse openers, closers and given voltages. It can be used for:

- Connection of group lamps
- Connection of error messages
- Connection of disoriented systems
- Call analysis of foreign systems (old contact-based systems)
- Connection of movement detectors
- Connection of fire alarm systems
- Connection of smoke detectors
- Connection of elevators
- Connection of door contacts
- And many more

Technical specification:

- LAN connector
- Output voltage: 24 V
- Inputs: 6
- Outputs: 5
- Current consumption: 100mA
- Max. output power: 120mA per output
- Dimensions: 47 x 54 x 35mm
- Weight: 41g
