

Advanced Safety Wristband with Lock Technology

Art.: ERTW0016-1-3

Advanced Safety Wristband with Lock Technology

Description

What is an Advanced Safety Wristband with Lock Technology?

The Advanced Safety Wristband with Lock Technology is a specialized wristband designed to be used with a wireless wristband transmitter, specifically created for individuals with dementia. It features a secure locking mechanism to prevent easy removal, ensuring continuous monitoring and safety.

Features

- Secure locking mechanism.

Benefits

- **Ensured Continuous Wear and Safety:** Prevents the wearer from easily removing the wristband, ensuring continuous use for safety and monitoring.

Technical specification

Dimensions

- Length: 160mm-210mm (adjustable)
- Width: 20mm
- Thickness: 1.4mm

Material

- Wristband: PVC & TPU Coated Webbing
- Clasp: PA2200 Black

Cleaning & Disinfecting Guidelines

- For cleaning, we recommend using standard household detergents.
- **Attention:** Avoid Alcohol: do not clean the product with pure alcohol, as this could damage the material.
- For additional cleaning instructions, please contact our sales team.

The locking mechanism requires a key for unlocking. The datasheet for Key for Advanced Safety Wristband with Lock Technology is available on the next page.

Key for Advanced Safety Wristband with Lock Technology

Art.: ERTW0016-1-4

Key for Advanced Safety Wristband with Lock Technology

Description

What is a Key for Advanced Safety Wristband with Lock Technology?

Key for Advanced Safety Wristband with Lock Technology is a specialized device designed to unlock the secure locking system of the wristband. It allows caregivers to easily open the wristband when needed while preventing the wearer from removing it themselves, ensuring enhanced safety and control.
