

NurseCare interface for connection of wired and wireless units with VLAN and BT connection

Art.: ERTW0115(IPBTG)

Description:

IPBTG is a room controller for installation in patient or resident room. It is connected to server via LAN or WLAN network and have possibility of connecting wired and wireless units.

Technical specification:

- Receives signal from NurseCare units for staff protection
- Receives signal from NurseCare nurse call system units
- Includes location functionality
- RJ45 POE port
- Additional power connector (24VDC)
- LAN connectivity for transmitting signals to an IP network

- Bluetooth 5.0
- Frequency: 2,4 GHz
- Transmission power 10 mW
- Numbers of Inputs for wired units: 6
- Numbers of outputs for wired units: 6
- Voltage: 24VDC/150mA or POE
- Weight: 150g
- Dimensions (W: 138mm / H: 30mm / D: 63mm)
- Compliant with CE certification requirements

Energy consumption:

- 5mA
